Q2 2021 PERFORMANCE OVERVIEW

The equities market, represented by the ZSE All Share Index gained 38.01% in the quarter ended 30 June 2021, extending the gains from the previous quarter driven by strong demand for listed equities from local investors. All Listed Equities and Balanced Portfolios recorded positive performances largely buoyed by the stock market performance. Alternative Investment portfolios registered positive performances driven largely by local currency revaluations of properties and unlisted equities. There were no significant fixed income portfolios of note held by any of the asset managers in this survey for the period.

Q2:2021 Performance Overview

The Q2 2021 Survey focused on Listed Equities, Alternative Investments and Balance Portfolios Composites, with none of the portfolios qualifying under the Fixed Income Composite due to negative real returns in the asset class. ZSE Equities, as represented by the All Share Index, advanced 38.01% during the quarter mainly driven by strong demand for listed equities by local investors. All Managers recorded positive performances due to an impressive performance from listed equities although most of them underperformed the benchmark due to relatively poor stock selection or a high exposure to foreign equities. The underperformance to some extent, is reflective of the asset managers' relatively high exposure to large caps/Top 10 counters, whose performance was below the benchmark - ZSE All Share index.

Mandate Based-Composites

Few Composites qualify as pure Equities or Alternative Investments, with the majority being Balanced Portfolio Composites based on signed Mandates. This reflects the general bias towards full allocation Managers instead of Specialist Managers in the Zimbabwean investments management industry.

YTD Performance Overview

Although all Managers performed in the positive for the YTD, most asset managers under-performed the listed equities benchmark. This was due to relatively high exposure to "blue chips" which underperformed the All Share index. The Managers, however, outperformed the balanced composite benchmark because of low exposure to the underperforming fixed income. Most alternative investment portfolios performed below inflation during the period under review.

FY 2020 Performance Overview

Although all Managers performed in the positive for the full year (FY20), most asset managers under-performed the listed equities benchmark. This was due to relatively high exposure to “blue chips” which underperformed the All Share index. The Managers, however, outperformed the balanced composite benchmark because of low exposure to the underperforming fixed income. On alternative investment portfolios, most asset manager portfolios outperformed the benchmark attributable to property revaluations.

Rolling 3-Year Performance Overview (2018-2020)

No portfolios qualified for the Fixed Income Composite due to negative real returns. 2020 Performances had greater impact on cumulative performances due to the stock market bull-run. Property revaluations in local currency at the interbank rate enhanced portfolio performances, especially for Alternative Investment Portfolios and Balanced Portfolios.

NB: Aggregate industry-wide performances are AUM-weighted sums for the relevant period. E.g. for FY2020, the aggregate performance of 627.9% is an AUM-weighted sum of each Manager's performance.

Glossary

Aggregate Composite Return/ Performance – The weighted average return of all composites involved in the survey.

Alpha (Excess Return) – The return achieved above the benchmark return.

Alternative Investment Portfolios – Portfolios for which at least 50% is invested in non-listed property and unlisted equities or other alternative investments.

Assets Allocation Based Composites – Are composites based on the actual exposures held by an asset manager i.e. the actual holdings.

Asset Class – Is a group of assets that exhibit similar characteristics.

Assets Under Management (AUM) – The total market value of assets/ portfolios held in a particular composite.

Balanced Portfolios – Portfolios which are balanced such that no one asset class accounts for over 70% of the portfolio (with exception of alternative investments where a minimum exposure of 50% applies).

Benchmark – Is the reference point for performance evaluation.

Benchmark Returns – A point of reference against which the composite's performance and/or risk is compared

Composites – An aggregation of one or more portfolios managed according to a similar investment mandate, objective, or strategy.

Fixed Income Portfolios – Portfolios for which at least 70% is invested in the money market, bonds and/or any other interest-bearing securities.

Industry Alpha – The return achieved above the benchmark return, where *industry* refers to the asset managers in the Intellego Survey and limited to the portfolios within the Intellego purview.

Listed Equities Portfolios – Portfolios for which at least 70% is invested in equities listed on the Zimbabwe Stock Exchange (ZSE) or any licensed securities exchange or Alternative Trading Platform (ATP).

Mandate Based Composites – Are composites based on the investment manager mandate signed by the asset manager, where the target benchmark was clearly set in advance.

Performance range – The minimum and maximum returns achieved by the asset manager in the period.

Relative Batting Average – Measures the proportion of asset manager portfolios that outperformed the benchmark in a particular period.

Total Firm Assets – The total market value of all assets held by the asset manager (including the ones not under Intellego)

ABOUT THE SURVEY

The Intellego Investment Manager Survey Report covers investment performances of the Investment Managers based on the institutional portfolios under their management and for which Intellego are the Investment Advisors. Where an Investment Manager had indicated willingness to have portfolios not advised by Intellego included, this will only be done on a firm wide basis on condition that Intellego shall have access to and independently calculate the returns of such portfolios. The performance figures are based on returns calculated by Intellego and Intellego takes full responsibility for the accuracy or otherwise of the numbers. The Composites are as defined by Intellego based on the general investment strategies and asset classes available in Zimbabwe. Each qualifying portfolio is included in a composite on the basis of its beginning of period asset allocation. The Policies related to Composite construction, calculation methodology and reporting of the Survey are available upon request from Intellego Investment Consultants (Ltd). Intellego reserves the rights to amend the Survey as it considers appropriate.

Commentary contained within this document is for informational purposes only, and is not intended as an offer or recommendation with respect to the purchase or sale of any security, option, future or other derivatives in such securities. Investing in involves risk, including possible loss of principal. There is no assurance that the investment objective of any investor will be achieved. Equity stocks of small-cap companies generally carry greater risk and more volatility, and may be more illiquid, than equity stocks of larger, more established companies. Investors should carefully consider an investment managers' philosophy style, fees, charges and expenses before investing any money.
